Каталог “blog”. Команда: `hugo new --kind post post/(название поста)`.

A terminal window with a dark background and light-colored text. The prompt is 'raflzaa@raflzaa:~/work/blog\$'. The first command is 'hugo new --kind post post/my-life', followed by the output 'Content dir "/home/raflzaa/work/blog/content/post/my-life" created'. The second command is 'hugo new --kind post post/Git', followed by the error message 'Error: /home/raflzaa/work/blog/content/post/Git/index.md already exists'. The prompt is then shown again.
